File No. IPU/UITs/Circular/405
December 26, 2019

CIRCULAR

In continuation of this office earlier Circular No. IPU/UITs/MISC/2019-20/338 dated 19.11.2019 regarding appraisal of status of various IT equipment in the University campus wherein all Officer / Officials / Faculty Members / Students were requested to extend their cooperation with existing IT setup.

Recently, this office has observed that in order to get internet access for their use many of the employees and students have been disconnecting the patch cord from wall mounted access switches installed at various locations in Academic Blocks and Hostels. Besides this, number of Official / Officers have been installing their personal "routers and modems" for accessing Wi-Fi networking which causes IP conflicts and looping in entire University Network.

Though, this office has already appraised that the existing IT setup has completed its effective working life and tends to become non-functional if these equipment are mishandled. Therefore, it is once again suggested to avoid locating or dislocating fiber patch cords from access switches and usage of personal unauthorized IT equipment for accessing internet connectivity. Further, it is informed that swift efforts are being made for restoration of quality support with the availability of AMC and new networking setup at the earliest.
