

## **Prof. P. C. Sharma**

FNASC., FNAAS

Ex-Dean, University School of Biotechnology (2003-2006; 2006-2009; 2012-2015)

**Designation:** Professor

**Subject:** Biotechnology

**School:** University School of Biotechnology

**Educational Qualification:** M.Sc. (Botany), M.Phil, Ph.D. in Agricultural Botany

**Email:** prof.pcsharma@gmail.com

**Educational Qualification:** M.Sc. (Botany), M.Phil, Ph.D. in Agricultural Botany (Genetics)

**Phone:** +91-11-25302306

**Specialization:** Plant Molecular Biology, Crop Biotechnology

**Field of Interest:** Genetics, Plant Molecular Biology, Agriculture Biotechnology, Bioinformatics

**Official Address:** University School of Biotechnology, Guru Gobind Singh Indraprastha University, Dwarka, Sector-16C, Delhi- 110078

### **Teaching/Research Experience:**

Prof. P.C. Sharma did his M.Phil. & Ph.D. in Agricultural Botany from Meerut University. He has over 25 years of teaching and research experience. Prior to joining this University in Nov. 2002, he served in Choudhary Charan Singh University, Meerut as a Lecturer and subsequently as a Reader in the Department of Agricultural Botany, and Coordinator, Department of Biotechnology. His main teaching and research areas cover genetics, plant molecular biology, agricultural biotechnology and bioinformatics. He has over 100 research publications to his credit. He has availed INSA-DFG International Exchange Fellowship in 1992, 1998 and 2009, and UNESCO Biotechnology Fellowship in 2000 at plant molecular biology unit of Frankfurt University, Frankfurt, Germany. During these visits, he worked on development of molecular markers for DNA fingerprinting, genome mapping and transcriptome analysis in chickpea. In 2002, he was awarded long term JSPS Invitation Fellowship for Research in Japan, which he availed at Iwate Biotechnology Research Centre, Kitakami, Japan to work in front line areas like Virus Induced Gene Silencing and Serial Analysis of Gene Expression. His group's most recent research on *in silico* mining and implication of microsatellites in genome evolution has been published in high ranking international journals and led to the development of two highly accessed microsatellite databases. He has undertaken a number of different research projects sanctioned by DBT, DRDO, ICAR, etc. He is a Fellow of the National Academy of Sciences, India (FNASc) and National Academy of Agricultural Sciences, India (FNAAS).

He is also Director (Research & Consultancy) and Director (Academic Affairs).

### 3. Chapters in Books

- 1) **Sharma, P. C.** and Chaudhary, S. (2016). NGS-based expression profiling of HSP genes during cold and freeze stress in seabuckthorn (*Hippophae rhamnoides* L.). In: Heat Shock Proteins and Plants Volume 10 (eds.) Alexzander A. A. Asea and Punit Kaur, Springer International (In Press).
- 2) Jain, A., Chaudhary, S. and **Sharma, P. C.** (2013) Application of DNA technologies for seabuckthorn improvement. In: Seabuckthorn – A Multipurpose Wonder Plant: Advancement in Technologies (ed.) V. Singh. Daya Publishing House/Astral International, pp. 167-178.
- 3) Grover, A., Jain, A. and **Sharma, P.C.** (2010) Microsatellite Markers: Potential and Opportunities in Medicinal Plants. In: Medicinal Plant Biotechnology (ed.) Rajesh Arora, CAB International, Oxon, United Kingdom pp. 71-92.
- 4) Ganghal, R., Raghuvanshi, S. and **Sharma, P. C.** (2008). Exploring seabuckthorn genome using molecular tools. In: S. K. Dwivedi, T. Perimalazagan, S. B. Singh and Z. Ahmad (eds.) Seabuckthorn- The Wonder Plant. SSPH Publishers, Delhi, pp. 347 – 371.
- 5) Shrivastava, D., **Sharma, P. C.** and Kumar, P. A. (2008). Gene targeting in higher plants. In: A. Kumar and S.K. Sopory (eds) Recent Advances in Plant Biotechnology and its Applications. I. K. Publishers Pvt. Ltd. India, pp. 78-92.
- 6) **Sharma, P. C.**, Matsumura, H. and Terauchi, R. (2007). Use of serial analysis of gene expression (SAGE) for transcript profiling in plants. In: RK Varshney and R Tuberosa (eds) Genomics-Assisted Crop Improvement: Vol. 1: Genomics Approaches and Platforms, Springer pp. 227-244.

- 7) Winter, P., Staginnus, C. **Sharma, P. C.** and Kahl, G. (2003). Organisation and genetic mapping of the chickpea genome. In: P. K. Jaiwal and R. P. Singh (eds). Improvement Strategies for Leguminosae Biotechnology. Kluwer Academic Publishers, Dordrecht, The Netherlands pp 303-351.
- 8) **Sharma, P. C.** and Varshney, R. K. (1998). Induced mutations in chickpea improvement. In: B. A. Siddiqui and S. Khan (eds). Mutagenesis and *In Vitro* Mutation Breeding in Crop Plants, Kalyani Publishers, India. pp. 58-68.
- 9) Gupta, P. K. and **Sharma, P. C.** (1991). Cytogenetics and related aspects in some pulse crops. In: T. Tsuchiya, and Gupta, P. K. (eds) Chromosome Engineering in Plants: Genetics, Breeding, Evolution. Part B, Elsevier Sci. Publ., The Netherlands, pp. 1-31.

#### **4. Editing of Proceedings of the Symposium**

Associate Editor, Genetics and Biotechnology in Crop Improvement. Proc. Symp.“Genetics and Biotechnology in Crop Improvement”, (eds. P.K. Gupta, S.P. Singh, H.S. Balyan, **P.C. Sharma** and B. Ramesh) Feb. 1997, Department of Agricultural Botany, Ch. Charan Singh University, Meerut. Rastogi Publications, Meerut, India. 414 pp.

#### **Construction of Microsatellite Databases**

We have constructed following two important databases for mining microsatellites in the sequences eukaryotic genomes and unigenes and retrieving related information. The two online databases are frequently accessed by scientific community interested in microsatellites.

**EuMicroSat db :** A database for microsatellites in the sequenced genomes of eukaryotes

**UgMicroSat db :** A database for mining microsatellites in unigenes

The above databases can be accessed free at [http://ipu.ac.in/usbt/EuMicroSat\\_db.htm](http://ipu.ac.in/usbt/EuMicroSat_db.htm) and [http://ipu.ac.in/usbt/UgMicroSat\\_db.htm](http://ipu.ac.in/usbt/UgMicroSat_db.htm)

#### **Sequences submitted to NCBI**

- **NCBI ESTdb:** My laboratory has submitted a total of 3412 high quality ESTs ( $\geq 100$  bp) to dbEST of NCBI in three lots, in 2008, having following GenBank accession numbers (GenBank ID: EY414394 - EY416137, FG35624 - FG357288, GT915047 -

GT915671). This was the first and only ESTs available in any public domain, of this important plant species.

- **NCBI- Short Read Archive (SRA) and Gene Expression Omnibus (GEO):**
  1. In another project funded by DBT we performed complete transcriptome analysis of seabuckthorn using NGS (Illumina plantform). Large amount of data has been generated from shoot and root tissue libraries of seabuckthorn. The Illumina short reads generated in the study have been submitted to NCBI's Short Read Archive (SRA) in 2013 with study accession number SRP011938, containing seabuckthorn leaf and root sample data under the accession numbers SRS304528 and SRS304529, respectively.
  2. We also employed DeepSAGE, a tag based approach, to identify differentially expressed genes under cold and freeze stress in seabuckthorn. The relevant raw and processed data generated during the study has been submitted to NCBI-Gene Expression Omnibus (GEO) in 2015 with study accession number “GSE62489”. The raw data has been submitted under NCBI's SRA with accession number “SRP049042”. The accession number of processed data is “GSM1527805” for Control, “GSM1527806” for cold stress and “GSM1527807” for freeze stress samples.
  3. In a DRDO sanctioned project on Hypobaric hypoxia, we used RNA-seq to study early-phase gene expression in the lungs of Sprague–Dawley rats and to identify key genes in response to acute hypobaric hypoxia. We have deposited RNA-seq raw data and processed files of this experimental work in the GEO database repository of NCBI in 2015 with series accession number GSE62688 and NCBI's SRA study number SRP049242.
